Master the communication paradigm and principles to communicate in a clear, persuasive and compelling way.

7

Master Stage Presence and Charisma

Become like that TED! Speaker on stage, able to not only story-tell ideas but to be a catalyst for conviction, collaboration and change in presentations

8

Experience Workplace Of The Future

Through realistic simulation and augmented reality

Programme Methodology

I Am Gifted! Advance programme will first expose your child to the various leadership styles and The Five Practices of Exemplary Leadership Model.

Your child will learn entrepreneurship through real life case studies of inspiring entrepreneurs as well as innovative and successful businesses. Entrepreneurship is not only applicable for starting a business, but is a rare quality that is highly sought after in promising corporate positions.

Through a Paper Linked-In Challenge, your child will build a professional personal image and learn to present themselves professionally to future employers. Your child will also enjoy various games and hands-on activities to master communication and presentation skills.

PROGRAMME SYNOPSIS

In the 21st Century, paper qualifications may not be even enough to get a person a good job, internship or scholarship. What matters more is the competencies and character qualities that a candidate has. I Am Gifted! Advance programme for age 13-19 will equip your child with the 21st-century career skill sets that will differentiate them from the rest.

This includes innovation, communication and presentation skills that a student **MUST** possess just to set foot into the interview room. Beyond that, your child will be highly sought after by employers for their leadership & entrepreneurship flair.

Student Leadership

In the climate of the 21st century, leadership has been found to be the most transferable skill in the marketplace. With leadership skills, one has the ability to hone human capital towards unprecedented success. Yet, the very definition of leadership is so vast and many find it hard to put a finger on which competencies are important. I Am Gifted! Advance condenses the best practices of leadership under one roof by utilizing the Kouzes and Posner 5 Practices of Exemplary Leadership Model. By utilising these competencies and adhering to the commitments it brings with it, your child can hone their leadership skills to influence, inspire and engage with anyone easily and with confidence.

Career Advantage

The 21st century workplace is volatile, uncertain, complex and filled with ambiguity. Indeed, your child will grow up to take on jobs that are not even invented yet. The true currency in this workplace is not just career progression or having a specialised skill. It is the ability to value add to the people that you work with and the people that you cross paths with. Being the best in the 21st century just doesn't make the cut anymore. A university degree only puts your child amongst thousands of applicants for a job. For your child to clinch the career of their dreams and fast track to career success, they need to find their differentiating point and ace the new age interviews like a pro. I Am Gifted! Advance will help your child find their voice by crafting and refining their personal brand so that employers would be the ones knocking on their doors to hire them!

Entrepreneurial Mindset

Today's socio-economic climate is much different from before. Traditional businesses are facing challenges from new technologies and concepts that did not even exist 5 years ago. The government is giving more support to SMEs that utilises technological innovation; and at the same time encouraging start-ups.

Entrepreneurship has also inspired a new concept – Intrapreneurship. Even if your child is not going to start a business, intrapreneurship, which is the corporate management style that integrates risk-taking & innovation approaches more associated with entrepreneurship, will be a skill that will set your child apart from the rest in consideration for a fast-track career progression.
